

DLP-360

**PULSED LIGHT
DECONTAMINATION**
FOR ROOMS
AND CLOSED SPACES

PHOXENE
FLASH TECHNOLOGY

**FRENCH DESIGNER AND
MANUFACTURER**

→ FAST AND EFFICIENT DECONTAMINATION OF YOUR SPACES

Decontaminates up to **99,99%** in **5 to 15 minutes** on a wide variety of bacteria and viruses, including Covid-19

+ Ease of use

With its Bluetooth remote control, DLP-360 is easy to use and completely safe for handling by hygiene and maintenance workers.

Compact and mounted on casters, DLP-360 is both **portable and easily movable** within a building.

+ Various applications

Discover the DLP-360 on Phoxene

→ PULSED LIGHT DECONTAMINATION ?

Pulsed light decontamination technology implements an output of light energy in a very short period of time (<1ms).

The effectiveness of the decontamination phenomenon results from the emission at very high levels of instantaneous power of destructive wavelengths for microorganisms (bacteria in vegetative but also sporulated forms, molds, yeasts, viruses).

- + No water, no chemicals and no mercury unlike continuous-UV technology
- + Decontaminates all surfaces exposed to light

→ REAL HEALTH SOLUTION

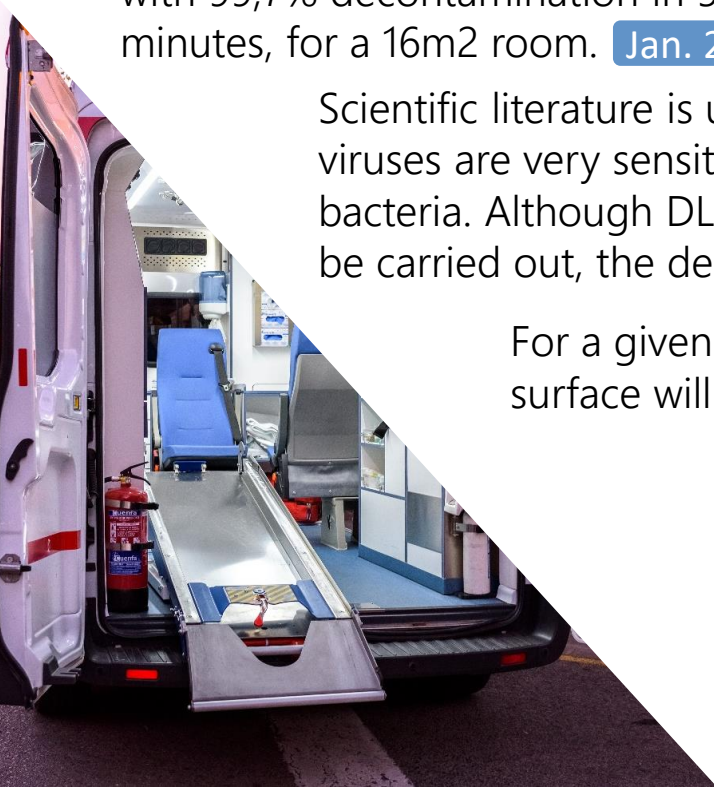

Since the emergence of the Covid crisis, unproven and misleading advertisements are circulating abundantly. **Phoxene's choice** : Transparency and trust with our customers and users

Tests carried out by an independent laboratory attest the effectiveness of DLP-360 on Staphylococcus Aureus and Salmonella with 99,7% decontamination in 5 minutes and 99,999% in 15 minutes, for a 16m² room. **Jan. 2021**

Scientific literature is unanimous, SARS-Cov 2 (Covid-19) viruses are very sensitive to UV, much more so than bacteria. Although DLP-360 tests on Covid-19 remain to be carried out, the decontamination levels will be higher.

For a given level of decontamination, a larger surface will require a longer treatment.

Phoxene supports its customers in the implementation of an appropriate usage protocol

SPECIFICATIONS

Floor space	420 x 400 mm
Height	1510 mm
Weight	38 kg
Power Supply	90-264 V (AC)
Power Supply	1100 W
Lamp lifespan	800 hours
Bluetooth interface with touchscreen	

Phoxene, designer and manufacturer, offers the DLP-360
- to distributors and service providers
- for sale or rental
